Forecast For Northeast England
Issued by Met Office Exeter
at 0400 on Thursday 04 Feb 2021

++ Valid for broadcast between 0600 and 1800

Headline:
Cloudy and wet.

Today:
Rain continuing for much of day, but gradually easing and becoming confined to the north later. Some snow is likely across higher parts of the Pennines and Cheviots during the morning, but it should become slightly milder through the day. Maximum temperature 6 deg C (43 deg F).

Tonight:
Cloudy, but becoming largely dry for a time this evening. However further outbreaks of rain will spread in from the south towards midnight and continue overnight. Winds strengthening later. Minimum temperature 3 deg C (37 deg F).

Friday:
Remaining cloudy and windy with further outbreaks of rain. These possibly turning wintry over higher ground later in the day as it becomes colder once again. Maximum temperature 5 deg C (41 deg F).

Outlook for Saturday to Monday:
Cloudy and windy Saturday with showery outbreaks of rain and hill snow, turning increasingly wintry overnight. Cold Sunday and Monday with brisk winds, sunny spells and snow showers.
